## **Parent/Student Survey**

This year I will be implementing some new strategies with my PE classes. We will have some "homework" this year. There is a new concept working its way through many school districts involving the use of technology in the classroom. This concept is known as a "Flipped Classroom." It involves students watching a short video at home over the internet. The videos will be short, no longer than 5-10 minutes, with a short quiz to complete afterward. These assignments should only take 10-15 minutes to complete. Students will even be able to complete these assignments on any device that can connect to the internet. Again, this is a learning process so there will only be a few assignments like this to start off. However, if it is successful, then there will be more towards the end of the year. My goal is to increase our students' physical activity time here at school. Students will be able to get moving as soon as they get to Physical Education. The following information will allow me to ensure that all students will be able to participate in these assignments and allow better communication between myself and parents. I really appreciate your cooperation and support. Please feel free to contact me with any questions or concerns.
